# LIFESTYLES

## What is the

The project covers 4 towns and includes parts of the Wigan Flashes, Leigh and Salford Moss lands, as well as the Mersey wetlands into Warrington

The industrial landscape that dominated South Lancashire is becoming one of the greenest areas of the North West – a wilderness among millions of homes.

The Carbon Landscape project will bring together previous restoration achievements with new works without losing sight of the ground-breaking heritage that made the region famous.

“The project has three broad objectives:”

- Restoration – To continue restoring a derelict landscape connecting wild areas to offer a better chance for wildlife
- Access – To reconnect people to the land
- Understanding – To raise awareness and remind local residents that this is YOUR landscape.

### Aims of the walks

To raise the public's awareness of these areas as places to spend your leisure time and to help recognize the historical importance and value of these areas.

The Walks in Warrington are delivered by :
